"COURAGE"

An all talking mother love
story, featuring

Belle Bennett

During Harvest

We spared no effort to supply you every need in our line of business.

After Harvest

We are trusting you to reciprocate by helping us to meet the obligations which were incurred.

Champion Meat Market

A Really Good Idea— Might Work Here

There is a general disposition to insist on the regular road rules being observed in towns and villages. There have already been several minor accidents in Champion and the way in which some truck drivers speed through the streets there are likely to be some major ones. Rules with regard to parking would also prove beneficial, and would increase the margin of safety. There is reason to believe everyone would welcome the adoption of reasonable regulations in this respect.

Rain Again Stops Threshing Operations

Threshing operations were just nicely in full swing after the rain at the week end when a second rainfall again stopped work on Thursday morning, and it will likely little threshing will be done before Monday. While the majority of the harvesting operations are completed in certain sections there are still several days threshing to be done, and some swath grain is still on the ground. However, it would require only about a week's good weather to practically finish the season's harvesting.

Local Nimrods Try Vauxhall On September 15th

A shooting party which included Guy Dow, Archie Bugles, G. M. Campbell, J. Ledgerwood, J. M. Moffatt, Dr. Frazee and W. Ulrich were at Vauxhall for the opening of the shooting season and had very satisfactory success, some eighty birds being secured by the party. Needless to say a splendid time was spent by all.

Bridge and Whist Party Friday, Sept. 26

A bridge and whist evening will be held at the home of Mrs. Woodhull Friday September 26, under the auspices of the W. I. Good prizes. Cards 8:30 sharp. Admission 50c. Everybody welcome. Conveners Mrs. Farmer and Mrs. Woodhull.

Hiawatha School Likely to Be Moved

A recommendation has been made to the Department of Education that the Hiawatha school be moved 1 1/2 miles south of its present location, which would bring it near the diversion of the road on M. P. Diemert's farm. The situation of this schoolhouse on the north side of Eight Mile Lake was so unfortunate in accommodating the pupils who wished to attend it that it has been closed for some years. Should the present recommendation be accepted it is understood the school will be opened at once. While any arrangement naturally fall to please everybody the solution arrived at should be a big improvement on the old situation.

Card of Thanks

I wish to thank ever so kindly the many friends who came to see me during my stay in the hospital, and to acknowledge the gifts of many beautiful flowers from the Women's Institute, the B.P.O.E., Mr. and Mrs. M. N. St. Peter, Mr. Ed. Anderson, Mrs. G. A. Johnson, the family and others.

T. R. JOPLING.

Shooting Season Opens With Many Patrons

The opening of the duck season on Monday was observed here with the usual enthusiasm by local nimrods. Very little information as to the success of the hunters seems to have circulated outside the organization, however, and it seems fairly safe to assume that no records were broken and that no bag limits were broken as duck hunters are not usually averse to the fish story kind of bag if there is any real chance to spring it.

Many Grade XII Students Leave Champion

The students who are taking Grade XII work in Calgary left the first of the week. They are: Ruby Alder, Helen Holm, Donald Stephenson, Donald Bond, Aileen McCullough, Edna Orr and Rheta Campbell. Marion Gardner will study at Blairmore. It is understood there are still others to go.

Lutheran Church Pastor Accepts Missouri Call

Rev. F. A. Duensing, Lutheran minister, has accepted a call to a Missouri point for which he will leave shortly. Mr. Duensing and family will be missed by his congregation here, which will at the same time extend their best wishes to them.

Wheat Prices Still Hover at Low Point

Wheat prices have shown little variation during the week one bulge of about two cents being the only incident apart from a slow decline in values. There are few indications of any immediate improvement. After dealing with the unemployment situation Premier Bennett has turned his attention to providing a market for the wheat piling up in the country, and according to his own statement expects to succeed in his efforts. It looks like a big job even for Mr. Bennett but everyone will wish him unlimited success.

Satisfactory Yields All Over the District

Very satisfactory yields of wheat have been reported from many sources. Eddie Weise threshed 3,000 bushels from 90 acres of summerfallow, M. J. Brett had summerfallow yielding 50 bushels per acre on which P. Holm, with a sixteen foot combine turned out 1,900 bushels in one day; Mrs. C. E. Anderson's summerfallow yielded 40 bushels per acre; Louis Warren had 700 acres summerfallow and stubble which returned 35 and 18 bushels, respectively; W. J. Porter threshed stubble in grain which yielded 28 bushels per acre; A. Nelson's summerfallow yielded 30 bushels; Oscar Sletto secured 40 bushels per acre from summerfallow; Jack Doyle's summerfallow yielded 38 bushels per acre and J. C. Anderson's summerfallow turned out slightly over 40 bushels.

Recognition For Teachers

A reception to the teachers will be held by the P.T.A. in the public school building on Monday evening, Sept. 29th, at 8 p.m. All parents are cordially invited, whether members of the P.T.A. or not. Mrs. G. A. Orr is convener for the occasion.

May Be Largely Their Own Fault

(Financial Post).

In undertaking to promote the use of Ontario canned products and manufactured foods the prime minister must be careful that he does not attempt to do what the manufacturers should do for themselves. He instates Campbell's soup, Del Monte peaches, and Swansdown cake flour as imported products that should be replaced by Ontario products. These products are standardized as to quality, can be bought by the consumer with complete confidence, have been extensively advertised and merchandised with all the keenness of American business acuity. The Ontario canner and miller has important pri-

many advantages in competition with these foreign manufacturers and all he requires to cash in on these advantages is to be at least as good a business man as his American competitor and, of course, to be protected against dumping. We doubt very much if canners and millers in Ontario are ready to admit they need advertising, paid for out of public funds, to enable them to meet competition.

Gottle is less prevalent in coastal districts than in inland areas. The reason is that coast dwellers eat more fish, and fish is rich in iodine which is a preventative of goitre. Inland people should see to it that they get more fish.—Fisheries News Bulletin.

NOTES AND COMMENT.

This would be an ideal time to add a cistern to the curing rink equipment. It is doubtful if such an opportunity comes again in the near future to secure assistance towards this very desirable end.

A more highly protective tariff is again being tried out. Under the present government all manufacturers have definitely promised not to raise prices. It is also certain that they won't reduce them until foreign goods go so low as to become competitive. Then more duty will become necessary to retain the business in the country.

Municipal interest in that \$20,000,000 is already in evidence and the opinion that extensive works should be undertaken in order to get a big slice of it as possible has also developed. Twenty millions may look very small when the final division is made.

In Manitoba representatives of banks, municipalities, live stock and agricultural bodies, and credit institutions will undertake to find some solution for the agricultural crisis which threatens to be a calamity owing to the low prices of wheat and severe grains. Lieut.-Governor McGregor advocates the feeding of stocker cattle on the cheap coarse grains available, instead of putting them on an over supplied market.

J. S. Woodsworth, labor member of Winnipeg, was the author of a motion in the Dominion parliament that fair wages be instituted in all works under the unemployment relief fund. The motion was defeated in the house by a vote of 71 to 109. The labor party would often appear to be more interested in maintaining an eight hour day and big wages than in relieving those needing work. Where the rest of the 71 votes came from must be traced to political expediency. To pay big prices for work of this kind would limit the work furnished as well as its distribution.

After noting the origin of the optimistic statements being circulated quite freely these days, the conclusion is forced that an optimist can easily make a nuisance of himself, in fact just as easily as a pessimist. Present prices for produce are not productive of optimism, even when the near future is considered, and to keep asserting that the corner has been turned and things will commence to improve at once is simply distorting the facts in order to produce a feeling of cheerfulness and light hearted spending which is far from justified. By meeting present obligations to the greatest possible extent and exercising care as to future commitments the average person will be doing more to help things to improve than by further involving himself.

Man can fly like a bird but he still has lots to learn from his feathered friends. It will be a long time, for instance, before he can sit on a barbed wire fence.—Ex.

Building operations at Churchill in October, Three or four hotels and restaurants will be among the first developments at the new port.

Knockout Riley—"Cheese, kid. Dat last article you wrote for de paper was a pippin."

One sound Pete—"Dat's wot dey tell me. Y'know, buddy, sometimes I wish I could read."—Life.

According to the Searle grain report the banks have discovered the only bright spot in the wheat situation and that is that the margin between supply and demand is narrower than it has been for two years.

"If you've spotted the man who stole your car, why don't you go and take it back?"

"I'm waiting for him to put new tires on it."

It may be some consolation to the average man to know that, potentially, he is worth \$2,000. This figure is the per capita wealth of Canada, according to figures compiled by the bureau of statistics which place the aggregate wealth of the whole Dominion, exclusive of undeveloped natural resources at \$28,940,000,000. Individually the people of British Columbia are the wealthiest, although Ontario ranks first among the provinces in total wealth. The per capita wealth of British Columbia is \$4,330; Alberta is second with \$3,717; Saskatchewan third with \$3,613, Ontario fourth with \$3,003, Manitoba fifth \$2,080, and Quebec with \$2,050. Nova Scotia had the lowest figure, \$1,550 while Prince Edward Island had \$1,750 and New Brunswick \$1,877.—General Motors Bulletin.

PUBLIC INSTITUTIONS

SHE TOUCHES A BUTTON and levels the mountain

There it is on Monday morning, looming formidably above every other household task . . . literally a MOUNTAIN OF DIRTY CLOTHES TO BE WASHED.

Either it means hours of back bending, scrubbing, wringing . . . or it means SIMPLY PRESSING the BUTTON that STARTS YOUR ELECTRIC WASHER. Into the gudy water each garment goes . . . the GENTLE BUT POWERFUL churning motion eliminates every particle of dirt . . . and out again IT COMES MIRACULOUSLY CLEAN. IT'S AS SIMPLE AS THAT.

A wide range of modern electrical appliances may now be purchased direct from the Calgary Power Company on a small downpayment—balance to be paid with your regular light bills.

See the local representative—S. WARNE.

A Distinction and A Difference

The average merchant, in a town like Champion, ordinarily will have from 100 to 200 accounts on his books.

We have at the present time

Over 500

the great majority of which are overdue subscriptions. A statement is not necessary, as you know just how you stand in the matter.

The amount of one account is small. Multiplied by 500 it means a lot of money.

The Chronicle

Responsibility For World Peace That Rests Upon Those Who Speak the English Tongue

Dr. Nicholas Murray Butler, president of the League of Nations, recently had a telling word to say of the responsibility for world peace of the English-speaking world.

Dr. Butler said: "Everyone within the sound of my voice has read those opening chapters of the first volume of the 'World Crisis'... These chapters trace with a hand of fate from Fashoda to Sarajewo what Mr. Churchill calls the milestones of Armageddon. You can actually see men in the hands of Fate marching to their death accompanied by an irresistible music of lure and ambition. Perhaps you will say that this seems to be an exceptionally interesting bit of journalistic work done by Henry Emily Labouchere, recently published volume called 'July, 1914.' He has assembled here what recent research enables him to do, and has placed in logical and chronological order every document which tells the story of that fateful month and the few days of the month that followed."

If you will read those documents you will see that perhaps twenty or twenty-five men, and only a few, carried ten million human beings to their death, disrupting the wealth of generations. What I mean, Mr. Chairman, is, imposing blame to none, least of all finding fault with an individual, but to point out that it is all that represents the bankruptcy of a mode of thinking upon which we must turn our eyes and which rises from the old-fashioned, selfish, competitive, quarrelsome nationalism to a new and better patriotism which finds a nation's highest purpose in its highest service. And when, Mr. Chairman, we state this fact, we indicate in a word the responsibility that rests upon those who speak the English tongue."

It makes no difference whether they live in this old homeland here or whether they have gone out overseas to build a commonwealth of Nations, or found a government of their own. Their responsibility is one and single and undivided because of the trust they bear, and that trust is the trust of those institutions of civil, religious, political and economic liberty which we have been building for more than a thousand years. These institutions it is that we owe to our fellow-men, and the time has come to this by effective example on our part, by persuasion and by leadership. We through those who speak our views and frame our policy. We dare not, Mr. Chairman, sit still and let matters drift and take their course."

Rust Not Poisonous

Scientists Do Not Consider Harvesting Of Rusted Wheat a Cause of Septic Poisoning
Scientists at the University of Saskatchewan engaged in rust research do not consider that the harvesting of rusted wheat involves special dangers of septic poisoning as is suggested in a news despatch from Vancouver, Sask., where a man is stated to have died of septic poisoning contracted while harvesting rusted wheat.

Dr. P. M. Simmonds, of the Dominion plant pathology department, considers that such danger is unlikely. The cause of death, he thought, would probably be due to getting dirt in a wound, a danger which might equally occur in the absence of rust.

"The truth hurts, and so would you, if you were stretched as much."

"Is there still as much fighting here in the village as there used to be?"
"Oh, no! The people don't agree at all now." — Nagels Lustige Welt, Berlin.

W. N. U. 1855

Safeguards the Consumer

Inspection Service For Fruits and Vegetables Assures Quality
The shipping point inspection service administered by the fruit branch of the Dominion Department of Agriculture is doing more than anything else to improve the quality and extend the market range of fruits and vegetables in both the domestic and export markets. Proving as it does a neutral determination, the certificate of the federal inspection service is accepted everywhere as the criterion of quality. The service applies to the canned as well as the fresh product, and the housewife buying canned products in Canada knows that she gets what she buys when she buys by the quality mark—'Choice,' 'Fancy' or 'Standard,' which appears on the label. The quality determined by inspection at the packing factory goes into the can before the label goes on. The Federal grade marked on the container is the consumer's safeguard and the assurance of quality.

Grain At Churchill

Will Be Successfully Grown Within Few Years Is Prediction
Wheat, oats and barley will be successfully grown at Churchill within four or five years, predicts D. A. Brown, of the Dominion Government Experimental Farm at Brandon, who has returned from a trip to the Bay of Frobisher. Mr. Brown forecast that grain would mature well at Churchill with proper cultivation and good soil.

Winnipeg Newspaper Union

SMALL DAUGHTER STYLISH
When little daughter reaches a certain age, you may fancy she'll be a little spoiled, a little rather than a straight rocket. Here is one which has both qualities. It can be worn either way, and is therefore as suitable a pattern for the little girl as her schoolgirl sister.

It is a pretty yoked, has ample room for the shoulders, and is sleeveless—a nice model for "back to school" again.

Carried out in cotton it is of course easily laundered and can have the wide ribbed edges as shown. In woolen materials the ribbed can be sewn on to a tape and made removable.

This is a childish way of adding a white touch as pique serves for grownups.

This pattern may be obtained in sizes 8 to 14. It is ready for immediate cutting. It is hand cut. Send 25 cents (in stamps or coin) to Pattern Department, and plainly your name and full address. The name of the pattern and the size you want.

Mechanical Hen Was Instructive Exhibit

Created Great Amount Of Interest At World's Poultry Show
The exhibits in connection with the recent world's poultry congress in London, England, were instructive and entertaining.

A model hen, seven feet tall, held the attention of thousands of visitors each day largely on account of its novelty. Made of wood, with a few feathers, this mechanical "hen" was a model of mechanical "internal organs" which were visible and showed how feed is ground in the gizzard and distributed. Naturally it could not be completed without an arrangement for laying eggs. A small motor operated the lathe on which the eggs were "turned." Then small manikins were attached to the various parts and appeared to furnish the power which really came from electric motors installed behind. With the aid of a special photograph record the lathe on which the eggs were turned. Full explanation of the internal processes and incidentally gave information on proper feeds and methods of feeding. The exhibit has shown a great deal of enterprise in bringing before the public the mechanical hen of the poultry industry and this "mechanical hen" is one of the outstanding accomplishments.

Marketing Geese

Good Time Now To Prepare Them For Shipment

The time to prepare geese for market is when the weather turns cold in the fall, and the geese are in the Dominion Department of Agriculture. They should then be taken off pasture and those selected for market should be put in small pens or enclosures, provided with plenty of water and kept clean. They should be fed heavily on whole corn the best medium for the fattening of geese, and about two weeks' heavy feeding should be given. Twenty-four hours before killing geese should be starved, but given plenty of water. Care should be used in plucking. The best methods being recommended, for the reason that the feathers are particularly valuable. Many uncooked carcasses of 60 cents per pound. The dressed bird should be rubbed over with a damp cloth and not added to cool. The twelve-bird box makes a desirable market package.

New Kind Of Sugar

Prepared For Table Use It Melts Quickly Into Frost

It is a well-known fact that some foods are difficult to sweeten properly. One puts sugar in a glass of tea and the sugar does not melt. It is a well-known fact that some foods are difficult to sweeten properly. One puts sugar in a glass of tea and the sugar does not melt. It is a well-known fact that some foods are difficult to sweeten properly. One puts sugar in a glass of tea and the sugar does not melt.

Steam From Volcano Heats Hotel
Operators of a hotel being constructed in Hawaii are eliminating all handling of coal for heating the building. The structure is being heated at the edge of the crater of Kilauea, the largest crater of an active volcano in the world. Steam from the volcano will be utilized to heat the hotel.

Canadian Cattle Re-enter England

Operators of a hotel being constructed in Hawaii are eliminating all handling of coal for heating the building. The structure is being heated at the edge of the crater of Kilauea, the largest crater of an active volcano in the world. Steam from the volcano will be utilized to heat the hotel.

Northwest Rebellion Veterans

Private Of Royal Grenadiers Visits Remains Of Battles Of 1885

Andrew Murdoch, who as a 21-year-old private of the Tenth Royal Grenadiers took part in the battle of Fish Creek, 30 miles north of Saskatoon, April 24, 1885, recently revisited the site of the combat.

He found the battlefield exactly as he remembered it to have been 45 years ago. He saw the ravine where the troops fired the half-bred's head rifle pits and from which they fired on the troops who lay on the ground. The troops then advanced and the rifles horses came galloping. They fired back at the Indians, but only got an occasional glimpse of one as the enemy had prepared pits just over the lip of the ravine and only a head would sometimes be seen as a man rose to fire.

General Middleton had a horse shot under him and his cap blown off by a bullet, an incident which Mr. Murdoch saw. He also recalls how a shell from the artillery blew up the Tenth House in which a number of rebels were concealed. A hollow in the ground shows the former site of this house.

After a time the Indians disappeared from the ravine and the soldiers entering it found about 100 of the Indians' horses which had been killed by the shell fire. They found no more dead. The graves at Fish Creek are those of artillerymen killed in the battle.

Mr. Murdoch also took part in the four-day battle at Batchoe, on May 9, 10, 11, and 12, 1885, with the big charge on the final day. The church at Batchoe near where the fighting began still stands.

Colonel Grassett, who commanded the Tenth House, is still living in Toronto, says Mr. Murdoch.

Egg Laying Contest

University Of Saskatchewan Hen States Good Showing

"Lady Victoria," former holder of the world's egg laying record, has completed her second year with an output of 203 eggs in her pullet year. The university poultry department, says it is a high figure and will provide the university with much material for breeding purposes. Two daughters of the former champion started laying this week.

The Proper Approach

A man who had been waiting patiently in the post office either of the girls he loved the counter. "The evening clock," explained one of the girls to her companion, "was a religious design in gorgeous lamb brocade, with fox fur and wide pagoda sleeves."

At this point, the long-suffering customer broke in with, "I wonder if you could provide me with a neat red stamp with a dinky perforated hole, the last ensemble delicately treated on the reverse with gum arabic. Something about two cents."

"England," says a news item, "offers a large field for the saxophone these days." What could be for a saxophone than a large field?

National Television On A Nation Wide Network Is A Dream Of The Future

Water and Salt

Live Stock and Especially Young Animals Are Often Neglected

How much the water and salt? As a rule, dairymen are careful that the cows always have plenty of good water. If the water is lacking or stale, the cows soon tell about it in the pail. Shorter milk cheques keep up interest to discover the cause. Observation reveals that the growing stock suffer more from lack of water through the hot months than do the milk cows. They are pastured away by themselves and not seen so often. If the water has to be pumped to them, it is often neglected. If they have a stream or spring and it goes dry, it may be days or weeks before the trouble is discovered. In too many cases the young stock drift by swamp water and take it only as a matter of necessity. Under such conditions they cannot be well, nor how good the grass may be. Another frequent cause of lack of drink is a shortage of salt. The salt box should be a regular part of pasture equipment. To build up a good store of minerals in the system a mixture of three parts bone meal and one part salt is advised. The same mixture should be used in the pasture for the milking herd.

Weed Seeds Are Hard To Destroy

Germination After Fifty Years Shown In Recent Tests

No wonder the farmer has trouble trying to eradicate weeds, for Dr. W. J. Beal, of the Michigan experiment station has just shown how long lived some of the seeds are. Fifty years ago he buried a lot of different kinds of weed seeds. Every ten years some of these seeds are dug up and the attempt made to germinate them.

Strange as it may seem, some of the weed seeds which did not grow at the end of five or ten years germinated to some extent at the end of 40 years. Foxtail lived for 30 years, but has not been growing for ten. Two-thirds of the tumbleweed seeds were still germinable after forty years. Curled dock seed has a much longer life than might be expected, and was eighteen per cent germinable in the fortieth year. Several weed seeds will not live for even five years, but a great many of them will retain at least some vitality for ten or forty years. Does this not show how very careful the farmer must be to cut the weeds before they have a chance to seed and spread many potential plants around.

Mass Production

On Western Farms Great Resources Of Capital Are Back Of Enterprise

The day when one or two thousand acres was considered a large holding have passed in Western Canada. Seven large land-owning companies now propose to farm about 850,000 acres. Great resources of capital are back of the enterprise.

"Very large farms in the past have not been conspicuously successful," says the Farmer's Advocate. The smaller farm, under the personal ownership and direction of the individual farmer, has been the foundation of Western Canada's agricultural progress. Changing conditions and the possibility of mass production by mechanical means may be ushering in a new day in agriculture, under which the individual farm holding will to some extent disappear.

Mail Was Delayed

Letters mailed 26 years ago in Paris have been sent to their destinations. The delayed mail was discovered when a truck demolished a post box in front of the Luxembourg station. Examination of the wreckage revealed that letters and postcards dated 1904 and 1905 had apparently slipped into a neglected corner of the box and were never collected.

Latest Paris Novelty

Map-study with meals is the latest novelty in Paris. Tablecloths are embroidered with outlines of countries, and lamps with map shades are the finishing touch. One popular direction is a chart of the moon embellishing a globular, oil lamp.

"What is the difference between capital and labor?"
"Well, I suppose I lent you \$5."

"Yes!"
"That is capital."
"Then what is labor?"
"Getting it back from you."

National television on a par with

sound broadcasting is a considerable distance in the future. When national television is a reality, engineers estimate, to say that Mr. Alfred Hitchcock, vice-president and general manager of RCA, and long identified with broadcast engineering, thinks it will not be possible until three years have elapsed, and it may be longer.

"It seems likely that national television service of proven value within a year would be a miracle," he said. "Within two years it would be an amazing feat; within three years it would represent a nice achievement of hard work, and within five years it would be a development proceeding at a good and normal pace."

"If television is developed as a service of real entertainment and instructional value to the public it will take its place beside radio broadcasting as a standard agency of human progress and enjoyment, but it is not to be expected that the day of television is as yet at hand."

"Laboratories are doing excellent work in the development of television and will probably ultimately bring the radio to a similar stage of public use. It is dangerous to make any definite prediction as to how long the day of television will last."

Dr. Goldsmith pointed out that the term television means so many things that a clarification is important. "Some think it means small, dim, blurry and shifting images. Others think it means perfect, large, brilliant pictures like the finest movies."

"Television is a radio service of pictures in motion of sufficient detail and quality to have continuing entertainment value to the public, equal to any other year after year. It is believed that it is necessary to be able to show clearly the head and shoulders of several people in a close-up and also action of a group at a greater distance with a reasonable amount of background detail."

"It is necessary that receivers supplied the public be simple, compact, equal to any other year after year, and visible in operation and reasonable in cost. Pictures must be brilliant enough to be seen in an ordinary dimly lighted room, of good color, adequate detail, of red pictorial value, without annoying flicker, and visible to persons seated in various parts of the room."

"In order that the people of the United States and Canada should enjoy such a service it must be carried out on a national scale. This means erection of numerous television transmitters. They must be located at proper points all over the country, and on occasion be interconnected by wire, radio or through shipment of film subjects so that programmes of interest may be brought to the public promptly."

Establishment of transmitting station and creation of programmes for the entire continent is a lengthy and expensive job. To be of value to the public, programmes must be arranged so that they will co-ordinate night and day, and about 850,000 acres of land for television for city, suburban and rural service must be determined. Inaccurate choice of wavelengths means ruined or unreliable transmissions."

Rose Growing Business

Rose growing as a business is rapidly developing throughout Canada into a trade of considerable magnitude, according to the Ontario Department of Agriculture. Although the great majority of growers are found in Ontario, nurseries and florists are cultivating roses in every province of the Dominion.

Good News For The Cook

It is planned at Paris to make a talking picture revealing the art of French cooking. The Preparation of French delicacies, sought after the world over, will be depicted and explained in the hands of an expert chef who will be seen at work. The film is intended for world distribution.

Absent-Minded

The professor who hasn't forgotten his umbrella—Hummel, Hamburg.

GOVERNMENT GRAIN INSPECTION

We are indebted to the Seale Grain Co. Ltd., Winnipeg, for the following article describing the system of Government Grain Inspection as carried on under the supervision of the Board of Grain Commissioners. The Dominion Government Grain Inspection Department is under supervision of the Board of Grain Commissioners, but the direct responsibility for the actual grading is placed upon the Chief Inspector for Canada and his deputies. These men are efficient, of high integrity and have had many years of experience.

The necessary qualities of a Grain Inspector are sound judgment, accuracy and a thorough knowledge of grain, as well as a general knowledge of the many different varieties and their respective milling values.

A good light is essential to grading. The Inspection Department always uses a north light so there is no glare from the sun, and a north light is always steady. The actual grading is never done later than 4:30 in the afternoon, thus utilizing the light while it is at its best.

After the samples are taken from the railway cars as described in our pamphlet "Government Grain Sampling," and have been delivered to the Grain Inspector's office, the first step in grading is weighing the samples to ascertain the test weight per measured bushel. Then the dockage is determined by weighing 500 grams (approximately a pound) of grain, sieving it and weighing the refuse or "dockage" which has been screened through the official standard sieves for that purpose. The test weight and dockage are recorded on the cardboard ticket contained in each sample bag.

The Inspector then grades the cleaned grain, placing grade and dockage on the "Inspector's Sheet," making notations regarding the quality, test weight and the load lines of the car. The samples are then checked and passed on by the Supervisors as to accuracy of grade, and thus double checked.

The inspection sheets are two in number, a larger and smaller. The larger sheet shows the full details, viz: car numbers, station shipped from, destination and to whom cars are consigned; the smaller carbon copy sheet, called the "Inspector's Sheet," only bears the car numbers—thus the Deputy Inspector.

Each sample bag showing samples as they arrive from railway yards. Each sample has ticket of identity.

Inspector grading grain samples. Note equipment and minimum standard samples.

pector does not know where the car he is grading is from or after what; each individual sample is graded on its own merits. After the test weight per measured bushel, the moisture content, and the sheets are put together by the clerical staff, grades are filled in, checked, and from the larger sheets the Inspection Certificates are made up. Each day copies of the inspection sheets are sent to the Government Grain Inspection offices at terminal unloading points to be used for binning purposes.

The most important of the mechanical aids used by the Inspectors are sieves, wild cat separators, scales and moisture testers. The sieves used for cleaning wheat are the No. 10 wire sieve and the No. 5 zinc buckwheat sieve. The moisture tester is used for separating wild oats and an Emerson dockage tester is used in the case of durum wheat. A No. 9 wire sieve is used for cleaning barley. For flax two sieves are used; the top sieve is a 3/8 by 6 wire sieve, while the bottom sieve is of zinc with 41/64 round perforations. The principal scale used is a 500 gram scale which gives percentage readings in four tenths. An imperial quart kettle is used for determining the moisture content of grain. The moisture content is determined by weighing a known quantity of grain, drying it in a desiccator, and weighing it again. The difference in weight is the moisture lost, and the percentage of moisture is calculated.

Before each Deputy Inspector are minimum standard samples of the different grades which are for his guidance. These standard samples are made up each fall for the new crop as early as possible by the "Western Grain Standards Committee." This Committee is made up of: one miller's representative, four representatives of the Producers of Alberta, five from Saskatchewan, three from Manitoba, one from British Columbia, the Board of Grain Commissioners, the Chief Grain Inspector, the Chairmen of the Grain Appeal Tribunals and the Chief Dominion Cerealist, making a total of twenty members.

If a shipper is dissatisfied with the grade placed on his car he has two recourse: to register protest; first he can call for a re-inspection of the unloaded sample for which Moisture testing room, where tests are made on each sample during a wet crop season.

If the grade is not raised and he is still dissatisfied, he can have the unload sample placed before the Grain Appeal Tribunal, whose decision is final. The fee for an appeal is \$3.00. If the grade is raised the fee is returned, and if the Inspector's grade is sustained the fee is forfeited.

Appeal Boards in the Western Division are situated at Winnipeg, Calgary and Edmonton. Each Board consists of eight members, including the Chairman, who is an independent assessor. A quorum of an Appeal Board or Tribunal consists of the Chairman and two other members, one of whose members to be a representative of the Producers.

The Western Inspection Division is all territory from the Pacific Coast to the Head of the Lakes. In this territory are several inspection points, namely, Port Arthur, Winnipeg, Moose Jaw, Saskatoon, Regina, Calgary, Edmonton, Medicine Hat, Prince Rupert and Vancouver. Approximately 130 inspectors are employed under the Chief Inspector.

There is also a large research laboratory in connection with the Inspection Department at Winnipeg. Its duties are to determine the milling and baking qualities of wheat and also to make protein and moisture determinations for the guidance of the Western Grain Standards Committee and the Inspection Department.

Our management pays careful attention to the grading of all cars consigned to our advice. The inspection certificate is compared with advice from the shipper as to grade attained, the official Government sample of the car is carefully examined in the Inspector's office and the shipper's instructions are carried out. Whenever we consider any better grade obtainable by a re-inspection it is ordered on the unload sample and if necessary we ask for an appeal.

New Device Demonstrated

Music Produced From Instrument Based On Radio Principles

By merely moving his hands before a plain looking cabinet, Lemington H. Sewell, a national broadcasting artist, created music of such unusual tone and beauty that radio engineers from all over America, who heard him, applauded enthusiastically.

It was the first public demonstration in Toronto of the Victor Thernim, a musical instrument based on radio principles, which had been brought here for the annual banquet at the King Edward Hotel held in connection with the fifth annual convention of the International Convention of the Institute of Radio Engineers.

The music of the instrument had been heard by many before on national hook-ups over the air, but more novel than the actual music was the simplicity with which the young artist seemed to produce it. Standing before a silver rod which extended above a plain wooden box, Mr. Sewell merely moved his hands back and forth to bring out the tones he desired. His right hand was used to bring out the melody, he explained later, and with his left hand he controlled volume, phrasing and expression.

The Thernim is named after its creator, a Russian, who conceived the idea that in the "squalls" of radio was hidden that could be utilized as music.

A study looking into causes of street car and bus traffic accidents showed that more than 20 per cent. of the street car and bus operators are "prone-to-accident" men.

An Aviation Mecca

Canada Is World's Best Testing Ground For Aeroplanes

Canada is the world's best testing ground for aeroplanes, as they are given year-round use under varying conditions in the provinces and on skis, said Ernest Robinson, vice-president of the Fairchild Aviation Corporation, in opening the new Canadian factory and aeroplane and seaplane base at Longueuil, Que.

The new plant, which was constructed by Fairchild, is expected to turn out about 150 Fairchild "planes" a year.

A philosopher of the fourteenth century has left it on record that: "Most men have three characters—that which they do exhibit, that which they have, and that which they think they have."

The Atlas moth, a night flying insect of Central America, is one of the largest insects in the world. Its wings measure 14 inches from tip to tip.

A new dress material is said to be made from steel. Artificial teeth for months will be the most thing.

SUNDAY SCHOOL LESSON

SEPTEMBER 21

JONAH—THE NARROW NATION.

ALIST HENRY

Golden Text: "Or a truth I perceive that God is no respecter of persons; but in every nation he that feareth him, and worketh righteousness, is acceptable to Him."—Acts 10:34, 35. Lesson: Read the Book of Jonah. Devotional Reading: Psalm 139:1-12.

Explanations and Comments

Jonah's Disobedience, chapters 1-2.—"Whenever we are conscious of an urgent voice which says to us, 'over and over, over! You ought! You ought!' it is likely that we are listening to the word of the Lord. It was thus that the word of the Lord came to Jonah telling him that he ought to go to Nineveh, that great city, and preach there the message that God had him. Instead of obeying the voice, Jonah went in the opposite direction, the story tells us. At Joppa he found a ship bound for Tarshish (the Phoenician colony on the southern coast of Spain, then regarded as the very end of the earth), and went aboard it. A violent storm arose, the sailors concluded that some one had offended his god, and they cast lots to discover the culprit. It fell on Jonah, and after three days cast him out upon dry land.

The Prophet Rebuked, 4:6-11.—Still unwilling to believe in divine mercy, Jonah created a cave for himself east of Nineveh and sat under its shade to see what would become of the city. The bookworms which he had constructed of branches whose leaves withered, but a gourd sprang up, and its living leaves afforded him grateful shade.

The gourd was eaten by a worm, and it withered, and then the sirocco from the desert of burning sand blew over him, and he fainted and again prayed that he might die. "What shall I give for me to die than to live," again cried Jonah. "Jonah's wish for death," 4 Kings 19.

"Don't thou think I will be angry for the gourd?" said God to Jonah. "I do will to be angry, even unto death," was Jonah's answer. "Thy pride as a prophet was hurt, and was he indignant that thou shouldst receive mercy from Israel's God. When Job was overwhelmed with affliction, and was told by his wife to 'Remounce God and die,' he answered: 'What shall I receive good at the hand of God, and shall we not receive evil'?"

"I never knew until I got a car," said the bishop. "That profanity was so prevalent."

"Do you hear much of it on the road?"

"Why," replied the bishop, "nearly everybody I bump into swears dreadfully."

A goodly number of water-fowl areas have been reserved as sanctuaries in the western provinces where so many of Canada's ducks breed.

How To Lose 24 Pounds of Fat

ALIST HENRY

At the Same Time Gain in Physical Vigor—A Clearer Mind and Swiftly Possess a Clear Skin and Vivacious Eyes that Sparkle with Health.

Here's the recipe that banishes fat and brings its bloom to the natural attractiveness that every woman possesses.

Every morning take one-half teaspoon of Kruschen Salts in a glass of hot water, before breakfast.

Be sure and do this every morning for it's the daily dose that takes off the fat. Don't miss a morning. Kruschen daily means that every particle of poisonous matter and harmful acids and gases are eliminated from the system.

Modify your diet, and take gentle exercise. The stomach, liver, kidneys and bowels are tuned up, and the pure, fresh blood containing these air salts is carried to every part of the body, and this is followed by "that Kruschen feeling" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

Not Cramped For Space

Accommodation On R-100 More Commodious Than On Trains

When the British air liner R-100 was in Ottawa, it was difficult to realize that the ship's weight in the air is actually over 100 tons. Its length R-100 is larger than any of the ocean liners that sail out of Montreal. The airplane to be larger than R-100 would have to be larger than the ocean liners in Ottawa.

Passengers on the air liner have cabins as commodious as the cabins on ocean liners. They are larger than the compartments in Pullman sleeping cars. There is more room on the promenade decks of R-100 than on the observation cars of transcontinental trains. The dining saloon will accommodate more passengers than will the dining car of any train. Under construction, when the long steel girders of the airship were to be seen, it conveyed an impression of strength much like the appearance of an ocean liner in the shipyard. Long before R-100 has reached the present age, of the British air "Mauretania," first class passenger travel will be almost entirely by air.

Royal Winter Fair

The Royal Winter Fair at Toronto this year will be held from November 18th to November 27th, both dates inclusive. The association has recently opened new and larger offices in the Reform Building, the change being made necessary by the expanding business of the association.

"I never knew until I got a car," said the bishop. "That profanity was so prevalent."

"Do you hear much of it on the road?"

"Why," replied the bishop, "nearly everybody I bump into swears dreadfully."

A goodly number of water-fowl areas have been reserved as sanctuaries in the western provinces where so many of Canada's ducks breed.

Be Certain of

SAFETY

Build with Gyproc

FIRE can hurt your home to destruction unless a fire-resistant material such as the new Ivory coloured Gyproc Wallboard is used in its construction.

Inexpensive, permanent, easy to apply, Gyproc Wallboard does not burn. It is exactly what you want for fire-safe walls, ceilings and partitions when you build, remodel or repair.

Ask your dealer today for full information on Gyproc Wallboard or send for interesting free book, "Building and Remodelling with Gyproc."

WORLD HAPPENINGS BRIEFLY TOLD

It is reported that Bert Balchen, Norwegian flier, who participated in the Byrd South Pole expedition, is planning a round the world flight.

Erastus G. Pearce, 60, vice-president and general manager of the Sherbrooke Daily Record, died at his home following a short illness.

Dieudonne Coste has been made an honorary colonel and Maurice Belton an honorary lieutenant in the Mexican air force upon suggestion of the ministry of war.

Believed to be the oldest telephone operator in point of service in the United States, Miss Elizabeth Good, of St. Paul, Minn., has retired. She served subscribers 50 years.

Canada's term as a member of the Council of the League of Nations, has terminated. Sir Robert Borden, the Dominion's delegate, will now participate only in meetings of the assembly.

High praise was given to the equipment of Canadian sanatoria by Dr. F. J. H. Coult, tuberculosis specialist of England, who sailed from Montreal on the Canadian Pacific liner "Montcalm" for Southampton.

It is understood that officials of the British Empire Trade Exhibition were planning to ask the air ministry to send the dirigible H-101, or the R-100 to Buenos Aires, next March, for the exhibition there.

With a pledge given by the Latin bloc, which controls 15 votes in the assembly, to support Ireland, it becomes practically certain that the Irish Free State will succeed Canada on the council of the League of Nations.

Economic loss to the Dominion through unemployment is \$10,000,000 a month, Mayor H. W. Cater, of Brandon, Man., president of the Union of Canadian Municipalities, stated at the opening of the 30th annual convention of that body at Hamilton.

Communist forces in China attacked British and United States gunboats. No fatalities were reported, though it was stated that the British boat's retaliation was the "heaviest attack against Chinese outlaws in recent years." It is thought that some members of the Red parties may have been killed.

No matter how severe, you can always have immediate relief:

Aspirin always steps pain quickly. It does it without any ill effects. Harmless to the heart; harmless to anybody. But it always brings relief. Why suffer?

CONTRACTS LET FOR ELEVATOR AT PORT CHURCHILL

Ottawa, Ont.—Important contracts in connection with the power equipment for the 2,500,000-bushel elevator for the Department of Railways and Canada is being constructed at Churchill, have been announced. The announcement came from Hon. R. J. Manion, minister of that department.

The boiler-house equipment will be supplied and installed by Babcock, Wilcox & Goidie McCulloch, Limited, of Galt, Ont., and the generator room equipment by the C. A. Parsons Company, Limited, of Toronto, Ont., and Newcastle-on-Tyne, England. The expenditure represented by these contracts will amount to about \$500,000.

Good progress is being made with the work of developing a port at Churchill, and the construction program laid down in the winter of 1927-28 has not only been maintained but, in certain respects, exceeded.

The program contemplated sufficient work and facilities to permit testing out of the route during the fall season of 1931. It provided for the completion of 600 feet of deep water dock by the end of the present season, the tidal use of the harbor during the entire season of 1932, and complete use of the port by the end of that season. Extra effort is, however, being made, and it is expected that at least 900 feet of dock will be completed before the closing down of the work this fall, and the entire 1,800 feet of dock is expected to be available by September 1, 1932.

The recent summer has been the hottest in the history of Hudson Bay Railway construction. This had its effect upon the railway, as it has made a good deal of additional ballasting necessary. That work also is receiving attention, and there are at the present time more than 2,000 men engaged upon either the railway or port facilities.

New Zealand Butter

Cargoes Being Rushed To Canada Before Duty Comes Into Effect

Vancouver, B.C.—Two Pacific liners are rushing towards Vancouver with shipments of New Zealand butter, the last which will come in before the Federal Government's duty of around four cents a pound on this article comes into effect.

The R.M.S. Averagh has 6,277 boxes to be landed here and 1,900 boxes for Victoria.

On October 10 the R.M.S. Niagara will bring another consignment, the amount of which is not yet known. In this latter case heavy demand on the butter market is expected to have the days between the arrival of the butter and the imposition of the tariff.

Bootlegging Of Grain

Manitoba Pool Takes Steps To Stop Practices

Winnipeg, Man.—A determined attempt to prevent the "bootlegging" of grain by pool members was started recently when eleven interim injunctions against farmers were sought by the Manitoba Wheat Pool before Mr. Justice Donohy in chambers.

Sale of grain by pool members to non-pool purchasers is a breach of the organization's five-year contract, and constitutes what the trade calls "bootlegging."

Sixty Bushels To The Acre

Prince Albert—Thrashing halted by rain, reports pouring in from this city indicate that for bushel per acre yield of wheat standing in the field has been shattered this year in many districts. R. J. Burke, White Star, and A. Chabou, of Foxford, claim to have threshed fields of Garret which yielded 60 bushels to the acre, while Joe Guedo, of this district, reports a 55 per cent yield of Garret.

Graf Zeppelin Visits Russia

Moscow, Russia.—The Graf Zeppelin paid her first official visit to the Soviet capital, and was greeted when she landed at October field with red flags flying and bands playing patriotic Russian airs. After a brief visit she returned to Germany again. Dr. Hugo Eckener was greeted by high Russian air officials.

May Fly Up Flying

London, England.—The Daily Herald says that the Commander Charles Kingsford-Smith, Australian aviator who recently flew from Europe to the United States, has announced his plan for a homeward flight to Australia, and has quit flying entirely, on pilot's order.

W. N. U. 1/20

Wheat Crop Estimate

Federal Government Forecast Of Wheat Crop Is \$84,700,000 Bushels

Ottawa, Ont.—Canada's wheat crop is estimated at 34,700,000 bushels, of which 30,000,000 bushels will be garnered in the three prairie provinces. This is the forecast made recently by the Dominion Bureau of Statistics based on reports filed in on or about August 31.

Of the above total for all Canada 34,484,000 bushels is spring wheat. Last year's spring wheat crop totalled 28,016,000 bushels and the entire wheat crop was 30,450,000 bushels.

"The western wheat crop," the report states, "is very spotty and thus difficult to estimate because of a series of depressing weather effects from seeding until harvest."

"The crop has been favored by relative freedom from frost damage and by almost ideal weather for harvesting," the report declared. "The wheat crop is the extent of which combines have also aided the dry season to establish a new high record for earliness and volume of grain matured in the month of August. Inspections to date show the quality to be even above that of last year."

Fast Automobile Journey

From Toronto To Vancouver In 95 Hours And 15 Minutes

Vancouver, B.C.—From Toronto to Vancouver in 95 hours and 15 minutes is the record achieved by two youths of Oakville, Ont. The fastest train scheduled takes 85 hours to make the same journey.

Dick Henry and Vernon Dyes left Toronto Thursday, at 11 p.m., and arrived in Vancouver at 6:30 o'clock. They proceeded from Toronto to Sault Ste. Marie, thence across United States territory to Emerson, Minn., from there they followed the main prairie roads to Crown's Nest pass, through the Rockies to Vancouver.

May Return To Public Life

Humor That Hon. C. A. Dunning Will Continue In Politics

Ottawa, Ont.—The return to public life of Hon. C. A. Dunning, former Minister of Finance, who was defeated in Regina, is still regarded as very much of a possibility.

It is suggested that Rt. Hon. W. L. Mackenzie King, opposition leader, had Mr. Dunning in mind when he made his reference to familiar figures who were absent from the Commons, during his speech on the address from the throne.

Mr. Dunning was one of the most prominent debaters in the Liberal ranks during the last parliament.

Steamship Breaks Record

"Empress Of Japan" Makes Fast Crossing Victoria To Honolulu

Honolulu.—Breaking all records from Victoria, B.C., to Honolulu, the Canadian Pacific steamship "Empress of Japan," arrived here in four days and five hours and fifty minutes for the 2,320 miles.

On her maiden voyage, the liner won the record when, between Yokohama, Japan, and Victoria to here, she made six hours and twenty-seven minutes, August 22. This trans-Pacific record had stood for seven years.

Toten Pole For President Hoover

Baltimore—Another gift is on its way for President Hoover's collection. It is a toten pole about a foot high, carved from a walrus tusk to be presented to him when he arrives to review the parade of the Veterans of Foreign Wars. The toten pole is the gift of Donald Post, Anchorage, Alaska.

Nurses Have Eight Hour Day

Ottawa, Ont.—As a measure towards relief of unemployment the board of trustees of Ottawa Civic Hospital, Ottawa, have decided to provide an eight-hour working day for nurses on the staff. Three shifts of nurses will now be employed daily in place of the present double shift of 12 hours each.

Oggopgo Still Lives

Hamilton, Ont.—Prompt action by Vernon, B.C., in broadcasting denial that Oggopgo had died a violent death, met with reward recently when the Union of Canadian municipalities voted to meet next spring at the sea serpent city. Vernon delegates promised a sight of Oggopgo, and the vote was unanimous.

Sixty Bushels To Acre

Lancer, Sask.—The biggest crop in this district was threshed on Mr. F. E. Spencer's farm, three miles northwest of Lancer, the average for the field being 60 bushels of wheat to the acre.

Wheat From Russia

Cargo Of Russian Wheat Is Received At Resident Near Port William

London, England.—The first example of Russia's wheat export campaign is the arrival of 7,000 quarters (a quarter equals eight bushels) of Russian wheat at Leith, in Scotland, for the Scottish Co-Operative Wholesale Society.

This is said to be the first Russian consignment to Scotland since the war, and it was made in spite of the reported stringent food shortage in Russia.

Cut-Off May Be Included

Appropriation For Winnipeg's Short Route To Bay Railway Expected

Ottawa, Ont.—Provision towards the construction of the proposed Manitoba cut-off in Manitoba to the Hudson Bay Railway will probably be included in the \$20,000,000 expenditure proposed by the government on national undertakings.

It is understood that work on the short route from Winnipeg to the Hudson Bay Railway will start this fall.

UNITED STATES MOVES TO HALT IMMIGRATION

Washington, D.C.—The state department has announced that in carrying out President Hoover's wishes for more strict application of the immigration laws to aid unemployment; conferences will be held at Winnipeg and Vancouver, in addition to three consular conferences overseas.

The Canadian conferences are set for this week and another date early in October. Foreign Service Inspectors will be present at the conferences. Mr. Monnett B. Davis has been designated to attend the conferences in the Dominion.

A conference at London, England, September 22 and 23 will draw the consular officers in France, Ireland and nearby points on the continent. Officers from England, Germany, Switzerland, Austria, Sweden, Italy, Czechoslovakia and Jugo-Slavia, will meet at Stuttgart, Germany, September 26 and 27.

A third conference for the consular officers in Poland, Finland and Latvia, completing the plans for all five immigration centres in Europe, will be held October 1 and 2, at Warsaw.

Under the president's plan, immigrants to the United States must show they will not become public charges. At present, aliens entering the country with position previously contracted for, are denied entry under the alien contract labor law.

Ottawa, Ont.—Announcement from Washington that more stringent measures are in contemplation in regard to migration to the United States was received here recently without any great degree of surprise. Unemployment in the country to the south has frequently been stated to be considerably worse than in Canada, and it was expected that steps might be taken to curtail the movement in that country.

It is generally accepted, however, that the present emigration from Canada across the border is not great enough to cause apprehension in Washington.

"Miracle" Heroine Here.

Lady Diana Manners, famous English society beauty and equally famous heroine of "The Miracle," during its New York and Boston productions, photographed with her husband, Captain Alfred Duff Cooper, D.S.O. (left), Viscount Ednam and his son William Ward, at Windsor Station, Montreal, on her first visit to Canada. The party are on an extended trip through Canada, as far as Vancouver through the Puget Sound.

Canadian Ace Killed

Captain Dickie Meets Death In Accident Near Port William

Port William, Ont.—Captain James A. Dickie, Canadian war flier, died when his plane swooped earthward and crashed in flames in the rough forest land ten miles from the outskirts of Port William. Eighteen-year-old Martin Swain, who was flying with Capt. Dickie at the time of the crash, lies in hospital here in a critical condition.

Cause of the accident, witnessed by only a few persons, could not immediately be determined. It is believed that the Gypsy Moth, a machine familiar to the war ace, swung into spin from which it could not be extricated. Position of the passengers in the debris did not indicate to rescuers which one was piloting the plane when the accident occurred.

Miss Swain recently obtained her student pilot's license.

Capt. Dickie, only recently named secretary of the Flying Club Association of Canada, was well-known among Canadian aviators. He had previously been instructor of the Port William Flying Club.

Formerly a resident of Winnipeg, he came to the lake head six years ago and operated a drug store in Port William. Only a few months ago he was married to Miss J. Burnett, of Port William.

A Golf Marvel

Consecutive Hole-In-One Title Is Held By Married Couple

Saskatoon, Sask.—Up at the little town of Waldron in northeast Saskatchewan, R. L. Penny and his wife have won the consecutive hole-in-one title for married couples.

Mr. Penny slapped a drive from the tee onto the Stella course and gazed as he saw the golf ball fall into the cup. His wife was still standing when he whirled his arms and the ball sailed over her head. A swing, smack, and the white sphere bounded toward the pin, rolled about in the hole, and dropped to the rim of its mate.

Mr. Penny says imitation is nature's sincerest form. Mrs. Penny claims female of the species is as deadly on the drive—as the male.

BRAND MAKES STRONG PLEA FOR A UNITED EUROPE

Geneva, Switzerland.—Aristide Briand, French foreign minister, turned his idea for a federation of European states to the assembly of the League of Nations in a dramatic phrase of warm admiration for himself and friendly sympathy for the principle of European collaboration.

In his address he attempted no piloting, or directing, but left it to the nations themselves to establish its definite future. He contented himself with arguing the necessity of some closer federal bond between the states of the old continent, and in asserting emphatically that neither the League of Nations, the United States, nor any other legitimate regional or international grouping would find it inimical.

It was regarded as likely the plan as outlined in M. Briand's memorandum of May 17, to the various nations and the responses of the powers will be submitted to a committee for study and action.

M. Briand recalled that when he first laid the idea before the world he had insisted his proposed federation be within the framework of the League of Nations. He repeated today that it must rest

"I lost one hundred and seventy pounds since I lost you."
"How so."
"My husband left me."

She 1931 Leadership Line... New beauty of design... New and exclusive Quick-Vision Dial... New Chassis... New Speaker... Regulated tone... Increased sensitivity... New Tone Control, giving definite tone shading of the Golden Voice... That's Atwater Kent Radio.

We have some real baks in use radios. Juko Leback has a new Mc-Dug, cream separator. Mrs. Leback says she can't understand how they turn so easily.

Don't be too discouraged because love is blind. Chaperons are not.

"Good Equipment Makes a Good Farmer Better."

Every purchaser of a farm machine is entitled to two kinds of service—service from the machine itself and service from the organization back of it. Nearly a century of service of this kind from the Haver Company assures the purchaser of McQuick-Trig. farm machinery the same kind of service in the future.

They call him Label because he sticks so close to the bottle!

Herb Williams and W. J. Porter have taken out a side delivery rake.

Willie—"Pa, does big any mean that a man has one wife too many?"

Pa—"Not necessarily, my son. A man can have one wife too many and not be a bigmist."

To our friends and customers who have responded to our recent letters—we think you.

We only wish we could thank all of our customers.

"Wall," reported the new salesman, swinging jauntily into the home office, "got two orders from Haden and Company today."

"Fine, Fine!" exclaimed the sales manager enthusiastically.

"Yup. One to get out, and the other to stay out."

Wm. Penn Motor Oils "Still the Best"

If you don't think co-operation is necessary, watch what happens to a car when a wheel comes off.

Abe—"Do you play golf with knickers?"

Levi—"No, vit white people."
